

Areco[®] Cheese

Nebulization creates the optimum environment for cheese merchandising

Cheese is a delicate product that demands an ideal environment to remain fresh and appealing. Areco[®] assures the optimum temperature and humidity levels required by all cheese products.

There is nothing else on the market that can provide the proper environment for cheese!

Studies show reduced weight loss up to 3% on average.

RETURN OF INVESTMENT

- No plastic wrap required, this saves plastic and employees' time (1 hour per day on average)
- Ability to leave cheese in the display case overnight preventing extra labor
- Low water and energy consumption: less than \$7 per month for both utilities

Aesthetics

Visual freshness of cheese and moisture lead to impulse purchases.

Only system that allows the display of unwrapped cheese in an open display case.

Nebulization movement attracts customers leading to impulse purchases.

In store customization of diffusion gives more flexibility to the setup of the display while keeping different products fresh.

The system is discrete in size and sound.
