

CI-SERVER
CASHINFINITY™
Cash management software

SMART Cash Management

GLORY Retail Solution offers SMART cash management. It provides total secure closed cash handling, centralised control of cash inventory and optimisation of all cash processes throughout a store. CASHINFINITY is the most advantageous cash management system with remarkable flexibility and extensibility for retailers to fit any size of store, various business segments and each investment plan.

Glory Global Solutions is a World Expert in cash management, delivering technology and solutions that provide security, productivity and innovation to our customers. These solutions are supported by the technical expertise of GLORY Group of Japan, the pioneer in development and manufacture of money handling machines across the financial, retail, vending machine, amusement and gaming industries for nearly 100 years.

Across the world, Glory Global Solutions is trusted by thousands of organisations to ensure their cash is managed securely and efficiently whilst delivering the ultimate in productivity. 2,500 professionals, including over 1,300 service and support staff and 350 business partners cover over 128 countries delivering these solutions – wherever money moves.

CI-SERVER – Technical Information

CI-SERVER

CI-SERVER cash management software, which can be operated via a web browser, provides the centralised management of cash throughout a store in the front and back office, for the interface cassette when in transportation and also when in the safe in the back office. The compact cash recycling system CI-10 and the cash recycling system CI-100 / CI-200 notify the cash inventory and all events to the CI-SERVER seamlessly. A store manager can refer to the inventory in real-time and CI-SERVER can also provide cash flow statistical reports. The CI-SERVER also has an email function which automatically sends an email to the manager when an event such as a full/empty cash status, collection/replenishment is required, and if errors occur.

CI-SERVER specification

Interface protocol	SOAP over HTTP(S)
Number of connectable units	CI-SERVER – unlimited CI-SERVER Small – up to 3 units
Database	Microsoft SQL Server 2008 Express
Programming language	Java™ 6
Web server	Apache HTTP Server 2.2.21 or later Apache Tomcat 6 or later
Using TCP port	The following TCP port must be free: – 80 for Web Server – 1433 for SQL Server 2008
Functions	Management of the cash inventory of all in-store CASHINFINITY devices Management of the device status of all in-store CASHINFINITY devices Configuration for all in-store CASHINFINITY devices Remote update firmware/template recognition of all in-store CASHINFINITY devices Remote log reading of all in-store CASHINFINITY devices Email notification CI-Connector, flexible communication function
Required hardware specification	
OS	Microsoft Windows 7 32 bit/64 bit Microsoft Windows Server 2008 R2 64 bit Microsoft Windows Server 2012 64 bit
Hardware	Intel x86 or compatible processor Minimum of 1GB RAM (Windows 7), 512MB RAM (Windows XP) Minimum of 16GB HDD (Windows 7), 2.1GB HDD (Windows XP) TCP/IP protocol support
Monitor	A monitor with a minimum resolution of 1,024 × 768 *CI-SERVER is software. Hardware is not provided by Glory
Client restriction
