

PRESS RELEASE

EURECAM INTRODUCES ITS NEW 3D PEOPLE COUNTING SENSOR !

March 5th, 2017

Düsseldorf, Germany - EURECAM, designer and manufacturer of people counting solutions in public spaces (museums, stores, shopping malls,...), is pleased to announce the launch of its new people counting sensor. To better meet the expectations of its customers, the company has developed a 3D counting technology allowing a better accuracy in complex cases. Since its creation in 2005, EURECAM has brought its expertise in the field of electronics by designing customized products that meet clients' needs.

99% OF ACCURACY

For flow analysis, EURECAM has developed an ergonomic and discrete product, facilitating integration on site, with a counting accuracy of up to 99%. Based on stereoscopic technology, EURECAM designed its own sensor with 3D analysis to better manage shadows and stagnation of the flow under the sensor. With the height map, it is possible to detect adults / children or filter carts, suitcases, strollers ...

TECHNICAL FEATURES

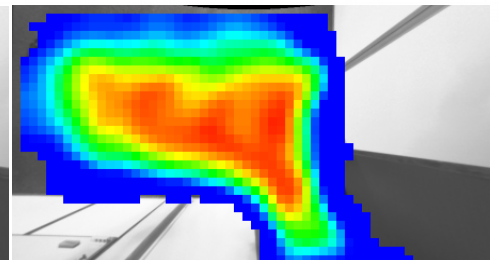

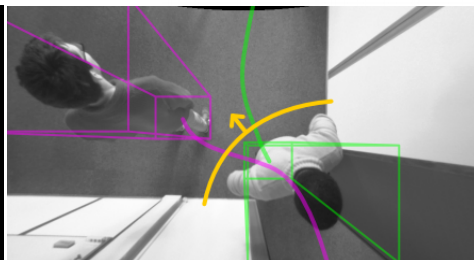

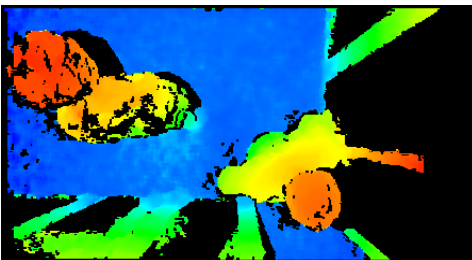

- Tracking / Presence detection
- Height detection management
- Low power consumption < to 3W
- POE supply / Ethernet communication
- API provided
- Optional interface card : Dry Contact, RS232
