

BEAT BOOSTERBAGS DEFEAT THEFT

Secure small, metallic - or round items
with TAGIT EAS Solutions

We have the pleasure of inviting you to join us on our stand at Euroshop between the 16th & 20th February.

Our general motto will be "Beat Booster Bags, Defeat Theft" as the Tagit 3D EM system, with Tagit EM labels, is the only system on the market which detects products well when placed in a professional Shoplifter Booster Bags, even if the label is touching the metal sides.

We very much look forward to seeing you on our stand E25 in Hall 7A. Please let us know if you have a preferred time and date when you would like to visit us, so we can try and keep it free?

GLOBAL SALES DIRECTOR **Neil Matthews**

We will be showing our latest improved Tagit 3D EM systems, which can now detect up to 1.2m with our new turbo twin labels and optic sensors and the system can now be monitored and managed remotely via the cloud with the addition of our new IOT Board.

Tagit will also be displaying its new range of high quality AM labels, as well as its Security Paper Hard Copy Protection Solution.
