

You have the ideas - we have the expertise to realise them.

Gmöhling -THE COMPANY

The only thing that isn't hot is the metal. Gmöhling – over 70 eventful years, more than 80 experienced staff and well over 1,000 great ideas about how to work aluminium.

Innovation is a tradition at Gmöhling. The desire to continually develop and improve is ingrained in the very essence of the company. This desire started with the founder of the company, Mr Gmöhling, and has been proudly adopted by our workforce in keeping with Gustav Heinemann's saying: "Those unwilling to embrace change will ultimately lose what they are seeking to preserve."

This approach enables us to continue to set new benchmarks in our industry. Our transport and disposal containers, transport and cupboard trolleys and pallets are now an essential purchase for many customers around the world.

Our production site in Fürth, Germany, which is over 8,000 sq.m in area, is ample testimony to Gmöhling's success and commitment to the site. Entrepreneurial vision, quality awareness, forward planning, sustainable production processes and durable, stable products have made Gmöhling what it is today: one of the leading manufacturers of aluminium containers in the world.

Gmöhling is of course certified to DIN EN ISO 9001: 2015

For decades, Gmöhling has enjoyed the reputation of being a professional, innovative, flexible and extremely reliable business partner among its discerning customers around the world.

When will you take the opportunity to see what Gmöhling has to offer?
