

let's make it
WITH LIGHT

MADE IN ITALY WITH LIGHT

There is a new tool to realize brilliant ideas and transform a project into **something special**.

Ideas and works take shape from the handcrafted workmanship of the flexible neo LED: **a bright line walks with imagination** and plays the games of creativity.

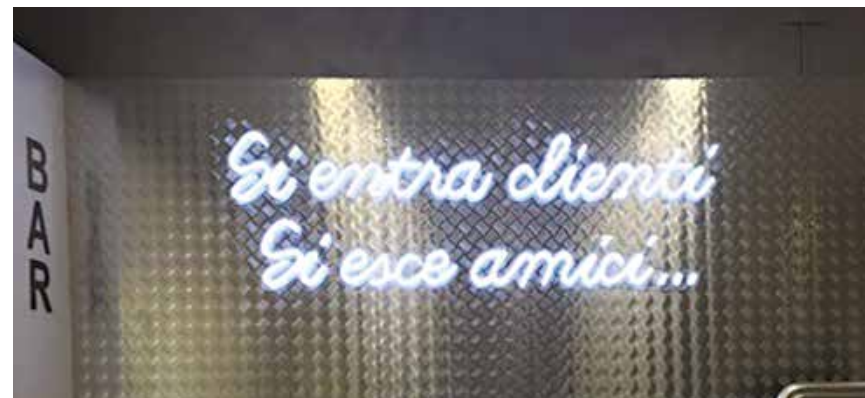

The result is a magical intertwining of lines and curves that finds its place in **visual and artistic communication** to make thoughts, concepts and aims real.

light makes
THINGS

BETTER

So, what's your next project?
